WE ARE OPEN!

Whisper Hearing Centers is open and available to see patients by appointment again! We have added extra safety and cleaning protocols to ensure our patients, employees and community are safe. Please call us today to schedule your appointment or to order any supplies.

Leveraging Artificial Intelligence

to proactively manage your hearing and overall health

With a growing mound of evidence pointing to a connection between hearing health and overall health, the team at Starkey has developed hearing aids that not only enhance listening experiences, but also proactively help users manage their overall health.

Starkey's Livio AI and their most recently released LivioEdge AI hearing aids use integrated sensors and artificial intelligence (AI) to provide the highest level sound performance in the most challenging hearing environments. With a simple tap on the LivioEdge AI device, you can initiate a scan of your environment to automatically adjust your hearing aid settings on the spot.

Furthermore, scientists have long believed the ear to be the most reliable place to track movement and monitor health metrics due to the ear being all cartilage and the most inert part of the body. Because of this, Starkey AI devices feature key health trackers, including:

Body Tracking

Staying active is key to staying healthy. Tracking steps and movement has been shown to inspire continuing or increasing activity.

Brain Tracking

A healthy social life can reduce stress and prevent depression, leading to better brain health. Monitoring hearing aid use and engagement can encourage more social interaction.

Fall Detection and Alerts

Designed to help you stay independent, falls can be detected and alert messages sent to selected contacts.

Starkey's hearing aids also come compatible with two powerful smartphone apps that put you in control of your listening experience and help you maintain your independence while sharing helpful information like physical activity, hearing aid usage and social engagements with your loved ones.

Baked S'Mores Cups

By: Moms Need To Know™

Prep time: 5 minutes | Cook Time: 13 minutes | Servings: 12

INSTRUCTIONS

1. Preheat oven to 350.
2. Crush graham crackers in food processor or in a plastic bag.
3. Add the melted butter to the crumbs and use a fork to mix.
4. Press the graham cracker mixture in to 12 holes of a mini muffin tin.
5. Bake for 10 minutes.
6. Remove from oven and place 4 or 5 chocolate chips in each graham cracker cup.
7. Cut each marshmallow in half using kitchen shears. Place a marshmallow half on top of chips (cut side down). Repeat until all cups are filled.
8. Return the pan to the oven for 3 minutes (until marshmallow is slightly soft).
9. Remove pan from the oven and place on a cooling rack for 15 minutes.
10. Remove cups from muffin tin to a serving platter.
11. Melt remaining chips in microwave by heating for 30 seconds and stirring then repeating until melted and smooth. Top each marshmallow with chocolate.
12. Top chocolate with additional graham cracker crumbs.

INGREDIENTS:

- 34 - 2.5" x 1.25" Graham Cracker Pieces
- 1 Cup Semisweet or Sweet Chocolate Chips
- 6 Large Marshmallows
- 4 Tbsp Melted Butter

PATIENT TESTIMONIALS

"Don't wait! Hear what you have been missing. The service was quick and complete. My audiologist did a great job with testing my hearing and fitting my hearing aids. I just can't express how it has changed my life. I hear sounds that I never knew were there."

- Danny

"These hearing aids are SO superior to previous ones: easy to put on, recharge, and clean. Sound is terrific, blocking out most background noise. I don't have to change my middle name to 'Huh?' now because I can hear clearly!"

- Deb

With **CaptionCall** you can understand every word of every phone call. It's large, easy-to-read screen quickly displays written captions of what your callers say.

is now on CaptionCall®

PERSONALIZING

Your Hearing Aid Experience

One of the biggest advancements in hearing aid technology is their ability to connect wirelessly via Bluetooth technology to enhance your hearing experience. With just the swipe of your finger, you can now easily and discreetly customize and control your hearing experience with intuitive apps straight from your mobile device.

Depending on your hearing aid manufacturer, hearing apps offer several functions, including:

- Changing the overall level of the sound with volume control
- Adjusting noise reduction and directionality settings
- Adjusting sound in different bands with an equalizer
- Saving your personal settings for different situations
- Changing the listening program you're using
- Tracking the battery life of your hearing aid
- Requesting assistance from hearing care professionals
- Downloading updates and new programs from your hearing care professional
- Learning tips about hearing aid use and care
- Locating misplaced hearing aids using GPS
- Connect to accessories such as television streaming devices
- Rating the quality of the hearing aid settings

At Whisper Hearing Centers, we work with you to initially program your hearing aids to fit your hearing loss and lifestyle. We establish a range that will enable you to customize your hearing experience, but also creates a barrier to help protect you against inadvertently harming your hearing.

Interested in learning more about what apps are compatible with your hearing aid?

Please contact Whisper Hearing Centers to schedule a consultation today.

Please mail in the card with payment to order. If you have any questions, please call 317-819-4546. Allow 3 weeks for mailing.
